

APPLICATION FOR FIRE LINE TAP

Prior to beginning work, a fire flow test must be completed, which must be witnessed by a Green Valley Special Utility District ("GVSUD") inspector. All fire flow tests must be completed by a licensed fire protection company or qualified testing agency who must send GVSUD a formal letter or report validating the test results. A fire flow test fee of \$200.00 will be due to GVSUD per test.

GVSUD shall charge the actual cost of the public fire hydrant or private fire line together with any and all other actual costs associated, for each public fire hydrant or private fire line requested.

If work on a private fire line tap or public fire hydrant install is to be completed by non-GVSUD employees or contractors, the following should be considered:

- All materials must be inspected and approved by a GVSUD inspector, and all fees must be paid in full. See attached detail sheet for GVSUD approved materials.
- GVSUD requires upstream and downstream valves when using a cut-in tee, and a turn-off permit must be approved by GVSUD and scheduled with our office.

APPLICANT INFORMATION:

Name of Applicant:	
Applicant Title, if applicable:	
Designated Contact:	
Phone Number:	
Physical Address:	
Mailing Address, if different from above:	
City, State, and Zip Code:	
Email Address:	

FIRE PROTECTION COMPANY INFORMATION:

Phone Number:	
Physical Address:	
Mailing Address, if different from above:	
City, State, and Zip Code:	
Email Address:	

Physical Address, Parcel ID,

and/or Intersections of Property:

Fire Marshal Jurisdiction:

Attach maps showing location of project/tap request, and location of hydrants to be used for fire flow test, or approximate location if necessary.
